

BUILD R2

Delivering the Essential
Energy and Biosecurity
Protection Your Sows Need

BuildR2 is a unique lipid product created for highly-prolific sows. **BuildR2** provides sows with the essential fatty acids and energy she requires for reproduction and high milk production levels.

BuildR2 provides the optimum levels of linoleic and linolenic fatty acids to aid in conception rate, increase pigs born and support more pigs weaned per litter in highly-prolific sows. Unlike other fats and oils, it is also rich in components that contribute to improved feed intake and natural protection of gut health. Feed Energy's trial studies show that adding **BuildR2** improved her reproductive performance by over 0.5 pigs per litter.

COMBINED BENEFITS:

- ✓ Optimized levels and ratios of essential fatty acids for reproduction
- ✓ Feed bio-security enhancement
- ✓ A low pH/pKa for gut and enteric health
- ✓ Colostrum quality and immunity
- ✓ Improved feed and energy intake to maintain milk production and sow body condition

BUILD R2

BuildR2 is a natural antipathogen, all vegetable feed supplement specifically created for sows to be bred, gestating sows and lactating sows. **BuildR2** provides optimum levels of linoleic acid to aid in the sow's conception rate. It has been proven to increase the number of live pigs born and provides the high-energy diet sows require to support milk production. Along with its natural antipathogenic properties, **BuildR2** will assure you the best performance possible.

PARAMETER	PRODUCT SPECIFICATION <i>TYPICAL ANALYSIS</i>
Metabolizable Energy	4,000 Kcal/lb
Total Fatty Acids	>90.0%
Moisture by Karl Fisher	<2.0%
Insoluble Impurities	<1.0%
Unsaponifiable Matter	<2.0%
Linoleic Acid	>50.0%
Pesticides and PCB	Below FDA/EPA tolerance levels
Initial Peroxide Value	< 5 meq/Kg
Preservative	Available Upon Request
