

Stim GAIN

FEED SUPPLEMENT

MAXIMIZE YOUR FEED. MAXIMIZE YOUR PROFIT.

StimGain is an ethyl alcohol-based feed supplement designed to support the natural appetite and functions of livestock, with specific formulations catering to the needs of each species.

Beef cattle depend on the rumen bacteria to receive nutrients and energy, which is why **StimGain** for beef is uniquely formulated to allow even greater amounts of volatile fatty acids (VFAs) to be generated and absorbed. These healthy microbes help improve rumen fermentation, which leads to greater health and maximized gains.

FEEDING STIMGAIN TO YOUR HERD

StimGain is easy to handle and can be added to your herd's feed in multiple ways.

- Add **StimGain** to grain mix
- Blend **StimGain** into total mixed rations (TMR)
- Use **StimGain** as a top dress
- Put **StimGain** in lick tanks

RATION GUIDELINES

- Standard Conditions: 1 lb. per 1000 lbs. of body weight
- Receiving Cattle: 1 lb. per 500 lbs. of body weight

KEY BEEF BENEFITS:

- Improves intake of feed and forage
- Improves rumen fermentation
- Reduces feed costs and waste
- Improves feed intakes and performance in receiving cattle and weaning times
- Optimized calving rates
