

Stim GAIN

FEED SUPPLEMENT

GROW/FINISH STIMULANT FOR SWINE

StimGain is an ethyl alcohol-based feed supplement designed to support the natural appetite and functions of livestock, with specific formulations catering to the needs of each species.

Increasing nutrient availability in swine will express itself in many ways—all contributing to increased production and profitability.

KEY BENEFITS:

- Increases nutrient availability
- Increases intakes
- Improves growth rate and production
- Easy to handle
- Net return on investments

FEEDING STIMGAIN TO YOUR SWINE

StimGain is easy to handle and can be added to feed by:

- Balancing and formulating diets using nutrient data
- StimGain can replace soybean meal and added fat in various situations on a pound-for-pound basis.
- Recommended feeding rate of 40-60 lbs. per ton.
